

# TDR100

The TDR100 is an essential companion tool to the TECH550pro and Tech600PRO range of TPMS tools. Adding a seamless process of reading tread depths complementing the Bartec “Test Before Touch” ethos, gives a comprehensive overview to both technician and customer, of the vehicle’s current status.

Simple integration to your Bartec Tool gives flexible number of measurement points and clear data on both the Tool and in your inspection report available through TPMS desktop or online.

Uses two replaceable AAA batteries and a replaceable pin design, the tool is light and robust.

- ✓ Bluetooth communication to Bartec’s TECH550pro and Tech600PRO products, automatically pairs to Bartec tools
- ✓ Visual depth measurement for quick check
- ✓ User replaceable measurement pin
- ✓ Configurable number of measurements per wheel using an integrated process
- ✓ Ergonomic design
