❶ May require LT1/LTZ OR TAL/TALZ truck weight
❹ Decorative chrome wheels require "TN" series.
❺ Some vehicles equipped with US-produced wheels. These wheels have different inboard/outboard configurations. Verify series with RGP-1.
❼ Some models equipped with wheels that have no outside flange. Use adhesive weights inside the wheel and "MCN" weights on the inside flange.
❽ Harley Davidson Edition uses "LH" series.

Installation Instructions

1. Select the correct application

Using a wheel weight application guide, select the correct application for the vehicle you are servicing. Check that the weight application is correct by testing the weight placement on the wheel flange.

2. Placing the weight on the rim

Place the wheel weight in the correct location of the imbalance. Prior to striking with the hammer, make sure that the top and bottom of the clip are touching the rim flange. The body of the weight should not be touching the rim!

3. Installing the weight using a hammer

Once the wheel weight is properly aligned, strike the clip with a proper wheel weight installation hammer. Please note: striking the weight body could result in clip retention failure or weight movement.

4. Checking the weight fitment

After installing the weight, check to make sure that it is secured properly.

How To Use This Guide

To help ensure customer satisfaction and vehicle safety, it is important that the correct wheel balance weight application be installed on all wheel types, including O.E. alloy and aftermarket wheels. For O.E. alloy wheels you can use this alphabetically organized application guide by locating the make & model for the vehicle you are servicing. Once the vehicle is located, intersect the make name with the make year to locate the correct weight series type and weight color code. For aftermarket wheels, or specialty O.E. wheels, always use a rim flange gauge (Part # RGP1) to determine the correct application or use a QuikStik® adhesive wheel weight.

Located on the chart, a light grey fill section indicates vehicle was either not manufactured or not factory equipped with an alloy wheel option for that particular model year.

MC

Solid color fill section with a weight clip series name indication means that the make/model/year combination you are searching for utilized the referenced weight series.

T MC

Mixed color sections mean that the weight series shown on the left is the primary application, while the one on the right could also be correct. The left weight is typically the outboard flange and the right is the inboard flange. This should be confirmed using a rim flange gauge (Part # RGP1).

If the application you are searching for is not shown, or the referenced weight series does not fit the wheel flange, use a rim flange gauge (Part # RGP1) to confirm the rim flange shape and determine the correct application for the job.

Important Notices

- Some wheels feature rim flanges that are not intended for clip-on wheel weight application and are only added for decoration purposes. All rim flanges that are less than 3/16" deep should utilize an adhesive wheel weight.
- Always use coated wheel weights
- Always check brake caliper clearance to the weight with a minimum of 1/8"
- When in doubt, always verify applications with a rim flange gauge (Part # RGP1)
- Wheel balance weights should always be installed by a professional technician
- Using the wrong weight can impair brake operation or steering or result in damage to vehicle. You should always utilize the correct weight for each application.
- Vehicle and rim manufacturer requirements, as well as state and local inspection laws, must always be observed
- Applications provided in this guide are for reference only and may not be exhaustive or apply to all make and model options
- All application information within is subject to change without notice
- WEGMANN automotive assumes no liability for loss or damage resulting from the incorrect or deficient installation of balance weights or because of a failure to observe applicable associated requirements.

❶ May require LT1/LTZ OR TAL/TALZ truck weight
❹ Decorative chrome wheels require "TN" series.
❺ Some vehicles equipped with US-produced wheels. These wheels have different inboard/outboard configurations. Verify series with RGP-1.
❼ Some models equipped with wheels that have no outside flange. Use adhesive weights inside the wheel and "MCN" weights on the inside flange.
❽ Harley Davidson Edition uses "LH" series.
